

# Post-Deployment Medical Processing Checklist

v20030415

## ALL PERSONNEL

ITEM	NOTES	DONE
1 Medical Debrief	Soldier receives medical threat debriefing. Medical threat debriefing materials can be obtained at <a href="http://chppm-www.apgea.army.mil">http://chppm-www.apgea.army.mil</a> .	
2 Soldier Guide to Redeployment	Soldier receives and reads "Soldier's Guide to Re-deployment". Guide is available at <a href="http://chppm-www.apgea.army.mil/deployment/Redeploy(SHG017-0502).pdf">http://chppm-www.apgea.army.mil/deployment/Redeploy(SHG017-0502).pdf</a> .	
3 Blood specimen.	Soldier gives a blood sample which will be submitted for HIV testing. Inform soldier that blood specimen will be forwarded to the DoD Serum Repository.	
4 Tuberculosis Skin Test	Unless medically exempt, all soldiers will receive a tuberculosis skin test and have results read at the time of redeployment. Refer soldiers with positive results for further evaluation IAW CDC guidelines. Advise soldiers with negative results they will require a repeat skin test at 90 days post-deployment.	
5 Terminal Malaria Medication	If on malaria chemoprophylaxis during deployment, continue same medication for four more weeks (ie, doxycycline 100 mg daily for 28 days or mefloquine 250 mg once weekly for 4 weeks). For those receiving doxycycline or mefloquine, also administer primaquine 15 mg daily for 14 days.	
6 Soldier Completes DD Form 2796	If not completed prior to redeployment, all soldiers will complete the POST-DEPLOYMENT HEALTH ASSESSMENT (DD Form 2796).	
7 Medical Examination	Face-to-face medical encounter with a provider (ie, physician, physician assistant, nurse practitioner, or independent duty corpsman/medical technician). During the encounter, provider will review any medical documentation generated during the deployment and complete the following specific tasks:	
	1 Review and discuss soldier's responses on the post-deployment health assessment form (DD Form 2796).	
	2 Review mental health or psychosocial issues commonly associated with deployments.	
	3 Document any deployment-related medications taken during the deployment (e.g., pyridostigmine bromide (PB) tablets, malaria medications, other) on the DD Form 2796.	
	4 Document soldier's concerns about possible environmental/occupational exposures on the DD Form 2796.	
8 Provider initiates referrals, as needed	Based on medical examination, provider determines need for and initiates referrals. Follow guidance in the Deployment Health Clinical Practice Guideline (see <a href="http://www.pdhealth.mil/">http://www.pdhealth.mil/</a> ).	
9 Document visit with ICD code V70.5-6	Assessment visit will be documented using ICD code V70.5-6 (for additional information go to <a href="http://www.pdhealth.mil/">http://www.pdhealth.mil/</a> ).	
10 Provider signs DD Form 2796	Completion of DD Form 2796 includes signature of the soldier and the health care provider. The original DD Form 2796 will be filed in the soldier's health record and a copy (paper or electronic) will be sent to the Army Medical Surveillance Activity within 30 days of returning to	
11 Integrate DD Form 2766 into Health Record	Integrate the ADULT PREVENTIVE AND CHRONIC CARE FLOWSHEET (DD Form 2766) and all documents included (ie, generated during the deployment) into the individual's health record.
